We buy your used racks, conveyors & mezzanines

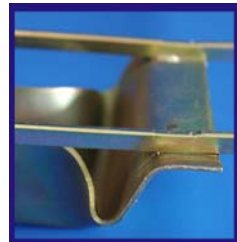

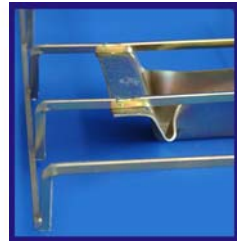

HARDY SMART DECK

Rectangular Wire Load Beam Design

- **27% STRONGER** than round wire decks with no additional weight.
- **42" x 45" deck** Fits 90", 92", 94", 96" and 98" beam span.
- **Hardy's Exclusive** 2 channel 12" filler panels when used with our standard 45" deck will span beam widths from 12" to 192".
- New Universal Reinforced, Welded Channel Ends allows one deck to be used for Step, Box, Channel, Sigma, Cee and Pipe beams.

HOW'S THAT FOR FLEXIBLE INVENTORY?

- Support and Snap-in Channels have reinforced bottom to add to stiffness and strength. Anti-Nile Virus feature keeps channels clean!
- **ZINC PLATED AFTER FABRICATION!** NO paint or zinc plated wire which is subject to severe rusting where welding burns zinc off, leaving bare metal.
